

## Cut Your Time, Expense and Risk of Storing Sensitive Cardholder Data

### Why Buy?

#### CardVault® is ideal if you:

- ▲ Maintain cards-on-file for the convenience of repeat customers
- ▲ Need help meeting Payment Card Industry (PCI) Data Security Standards for safely processing and protecting customer card data
- ▲ Want to minimize business risk by removing sensitive customer card data from your internal systems
- ▲ Process 5,000 to 500,000 credit card transactions per month
- ▲ Use your e-commerce, call center or financial system software to drive credit card transactions
- ▲ Take credit card orders by using:
  - ▲ Internet
  - ▲ Mail order
  - ▲ Telephone order
  - ▲ Fax

CardVault – the leading Credit Card and Customer Identification Storage Service [CCID] – delivers a cost-effective, world-class solution for companies that demand the highest quality payment data security and storage integrity.

### Benefits

#### Outsourcing Card Data = Less Risk of Breach

- ▲ Lowers the risk and consequences of a security breach by safely storing confidential customer credit card and payment data at 3Delta Systems'® PCI-certified processing centers
- ▲ Replaces stored credit card numbers on your internal databases with aliases
- ▲ Protects confidential, personally identifiable data, including HIPPA and Privacy Act records

#### Faster and Easier PCI Compliance

- ▲ Lowers your PCI compliance burden because card data is no longer stored at your site

#### Saves Time

- ▲ Safely maintains cards-on-file for repeat customers
- ▲ Enables easy card record updates and additions in real time
- ▲ Eliminates data re-entry for repeat customers

#### Saves Money

- ▲ Outsourced security solution produces lowest life-cycle acquisition cost vs. building or buying in-house
- ▲ Allows your personnel to stay focused on core business operations
- ▲ 3Delta Systems' "Level 3" line-item detail card processing tools help lower costs on B2B and B2G purchase card transactions

### Features

#### Secure Data Storage

- ▲ Supports business continuity plans by maintaining a secure copy of important customer records
- ▲ In addition to card data, securely stores up to 5K bytes of customer information per record

#### Seamless Integration with Existing Technologies

- ▲ Platform-neutral design works seamlessly with all computing environments and business systems
- ▲ Works with and supports existing business processes
- ▲ Card processing tools unbundled from the card network allows choice of processor

#### Flexible Implementation

- ▲ Supports real-time or file-based processing
- ▲ Data is securely exported and forwarded to 3Delta Systems and can then be purged from the host system
- ▲ Alias that corresponds with a customer account can be assigned by either the merchant or 3Delta Systems
- ▲ Card records can be updated and added in real time

#### Customer Convenience

- ▲ Supports web-commerce application with "My Profile" convenience for repeat customers
